TOCH SOTHAK

Backend & Mobile Developer

Phnom Penh, Cambodia
Email: tochsothak882@gmail.com
Phone: +855884788421

SUMMARY

Backend and mobile developer at Maxx Business Software, building PHP backend APIs and Flutter mobile apps in production. Joined as a PHP backend developer and now work across backend APIs and mobile apps, contributing to HRMS, e-commerce, POS, social and ERP products.

EXPERIENCE

Backend & Mobile Developer Nov 2025 - Present

Maxx Business Software, Phnom Penh - joined as a PHP backend developer; completed a 3-month internship and a 3-month probation period, now full-time staff.

- Build and maintain PHP backend APIs that power web and mobile applications.
- Develop Flutter mobile apps, from API integration through to UAT and production release builds.
- Contribute to ESS Online and ESS MJQE (HRMS employee self-service: attendance, leave, overtime, timesheets), Moow Online (Facebook live-selling and shop app with POS and inventory), Maxx POS Order, FlipFlop social media, and ERP modules.

SKILLS

Languages: PHP, Dart, SQL | **Frameworks:** Laravel, Flutter | **Database:** MySQL

AI-assisted development: AI tools for research, code scaffolding and debugging, with manual review and testing.

PROJECTS

SmartExpense - Graduation Project (Flutter + Laravel API)

Personal finance tracker with multi-account balances, multi-currency support with real-time exchange rates, OTP email login, role-based accounts, expense reporting, Hive offline caching and dynamic charts.

MyStore App (Flutter + Express.js + MongoDB)

E-commerce app with responsive UI, real-time product updates and Provider state management.

Phoneshop (Spring Boot + Thymeleaf)

Web app managing phones, orders, categories and customer reviews. Other academic projects: Gym App, NASA API app, Weather Forecast, Quote Generator, Unity 2D game, To-Do list.
